From Marabu you will need...

- transparent film DIN A4
- fun & fancy outline white (870), outline black (073)
- fun & fancy 80 ml in your favourite colours. Here we used: yellow (019), orange (013), cherry red (031), bordeaux (034), light blue (090), ultramarine (055), turquoise (098), light green (062), olive green (065)

Here's how it's done:

1. First print out the design in full size (find on www.marabu-creative.com ➡ Tips & Ideas) and put under transparent film. Clear plastic folders make a good alternative to transparent film.

2. Copy all lines with black outline paint. A slightly fuller outline adds character and is produced by drawing two lines directly next to each other in outline black.

3. As soon as the outlines are dry (at least 2 hours), paint all inside areas with fun & fancy colours directly from the bottle. Fill in right up to the outlines and do not leave empty spaces within the outline. Allow to dry completely (about 24 hours). Then carefully peel off the shapes from the film and decorate wherever you choose. They stick to all smooth, grease-free surfaces. The shapes can be peeled off and re-applied several times.

Tip:
- Instead of painting the shapes onto transparent film, try using adhesive film. Once dry, leave on the film and cut out close to the outline. They will peel off even more easily this way.
